

SARS- CoV-2 RNA PCR Test Report

PATIENT DETAILS

Patient ID : 20016785 Mob. : 71754957

Patient Name : Mr. MOHAMMADMAHDI ANARI

Age/Gender : 27 Y 10 M 14 D / M

Collection Date : 12-Jan-2022 08:10 AM

Report Date : 12-Jan-2022 01:49 PM

Nationality : Iranian, Persian

Clinician Name : Dr.NAWAL MOHAMMED AL-KINDI

Clinic/Hosp. Name : ADLIFE CLINICS & LABORATORIES

Test Code : AD001

Test Name : SARS-CoV-2 RNA PCR Test C-R

Reg.ID/Lab. ID : ADL-58409 / I-CO00036124

Sample Type : Nasopharyngeal Swab

TEST RESULT

INFECTIOUS DISEASE

Test Name	Result	Remarks
SARS-CoV-2 RNA PCR Test C-R	NOT DETECTED	Test Performed by RT-PCR (ORF1ab gene, N-gene, S-gene) CE-IVD Kit

Comment:

Methodology : Whole RNA is extracted from Viral Transport Media. One step Real Time PCR is performed to detect three genes of SARS-CoV-2 RNA Virus.

Disclaimer : Detection of atleast two genes will be reported as positive.
Detection of one gene will be consider as inconclusive result and request for resampling (re-swab).
If low postive result, recommended to re-swab after one week.
If any discrepancies in the report we will send the amendment report with in 24 hours.

Note : The result of this patient is valid till the date of collection of sample Adlife is not responsible if there is any infection occured post collection.

*** End Of Report ***
